

Momentum Managed Portfolio 3

28 June 2024

For professional advisors only

INVESTMENT OBJECTIVE & STRATEGY

To achieve inflation beating returns over time from a mix of different asset classes, within a tight risk controlled framework. The Portfolio can invest in a range of asset classes such as equities, bonds, real assets, absolute return funds and cash. Managed Portfolio 3 is designed to target a real return (above inflation) of 3% over the longer term and is aimed at investors who have a low tolerance for risk.

Peer group: Dynamic Planner Risk Profile 3. Performance is calculated on a total return basis in GBP terms. The value of the underlying funds and the income generated from them can go down as well as up, and is not guaranteed. Investors may not get back the original amount invested. The value of investments involving exposure to foreign currencies can be affected by currency exchange rate fluctuations. Past performance is not a guide to future performance.

MONTHLY COMMENTARY

- Broad equity indices masked an extraordinary dominance of megacap tech stocks, where the AI boom continues to leave behind those who fail to embrace it driving the US index to multiple new highs over the quarter.
- Equity markets outside the US were mixed, with Japan consolidating after a surge in Q1, Europe flat, held back by weak growth prospects and political worries in France, while the UK continued its recovery.
- Emerging markets were buoyed by a bounce back for China despite considerable headwinds.
- Bonds were generally flat over the quarter with credit spreads remaining at historically low levels.
- Returns were obscured by a significantly wide trading range, a reflection of the considerable uncertainty about the timing and extent of rate cuts.
- The pace of decline of inflation continues to be a key driver of markets and while data in recent weeks showed tentative signs of softening, the Fed remains cautious about cutting rates too soon.
- Global developed markets returned 2.7% with emerging markets returning 4.7%. Within developed equities, the US was the strongest performer over the month returning 4.3%. UK small-caps and continental Europe were the laggards, returning -3.1% and -1.6% respectively.
- UK gilts and UK investment grade corporate bonds returned 1.3% and 0.8% in June, whilst US treasuries and US investment grade corporate bonds returned 1.7% and 0.8% respectively, supported by the dollar which rose 0.8% against the pound.

IMPORTANT INFORMATION

Factsheet asset allocation percentages are in some cases based on the normalised (or benchmark) asset allocations of investee funds, as opposed to the actual exposures of those funds at the date of the factsheet. This reflects the expected average allocation over time which will result from decisions to hold particular funds.

Nothing contained herein constitutes investment, legal, tax or other advice nor is it to be solely relied on in making an investment or other decision. If you are considering investing in the Momentum Managed Portfolios clients should consult a suitably qualified and approved Financial Adviser. The performance shown represents performance of the Managed Portfolios that are periodically restructured and rebalanced based on the impact of material, economic and market factors that influence MGIM's decision-making on asset allocation. The Managed Portfolios are applied to client accounts by the platform provider but it may take some time for the client accounts to mirror the performance of the Managed Portfolios. It is for this reason that client accounts may not have achieved exactly the same returns as the Managed Portfolios. The performance of the Managed Portfolios is based on the actual performance of the underlying funds included in the portfolios. These performance figures have not been audited by an external body. The value of investments may go down as well as up and the value will depend on fluctuations in financial markets outside MGIM's control, as a result an investor may not get back the amount invested. Past performance is not indicative of future performance and reference to a security is not a recommendation to buy or sell that security.
