

Momentum Passive Plus Moderate Portfolio

29 August 2025

For professional advisors only

INVESTMENT OBJECTIVE & STRATEGY

The Momentum Passive Plus Moderate Portfolio aims to deliver growth in real terms aligned to the risk profile of the solution, with anticipated volatility in the range of 8-11%. The portfolio aims to operate within the 'low medium' risk profile. The portfolio will invest across a range of asset classes using passive instruments.

The value of the underlying funds and the income generated from them can go down as well as up, and is not guaranteed. Investors may not get back the original amount invested. The value of investments involving exposure to foreign currencies can be affected by currency exchange rate fluctuations. Past performance is not a guide to future performance.

MONTHLY COMMENTARY

- Equity markets were mixed in August, as global equities returned 0.4%, while global bonds rose 1.5%. US, UK and Europe ex-UK equities returned -0.2%, 1.5%, and 1.4% respectively. Japan and China delivered strong returns, rising 4.9% and 2.7%, with Chinese mainland 'A' shares climbing 9.2% amid stepped-up property market support. US small cap stocks surged, with the Russell 2000 up 4.9%, while megacap tech underperformed as the Magnificent Seven fell 0.8%. Q2 earnings supported sentiment, with over 80% of S&P 500 companies beating forecasts.
- Financial conditions remained accommodative, reflected in historically tight credit spreads and volatility at yearly lows. The US dollar weakened, slipping nearly 2.5% against the euro, sterling and yen, which lifted gold by 2.6% to new highs.
- Global economic data was broadly resilient. US inflation stayed within expectations, though tariffs began pushing input prices higher. Labour market indicators softened, with slower payrolls and higher jobless claims, but Q2 GDP growth was a robust 3.3% annualised. Although most key trade tariff deals have been concluded, uncertainty remains over their impact on growth and inflation.
- The Fed signalled a dovish shift at Jackson Hole, citing rising employment risks. Markets now expect two rate cuts in 2025 and further easing into 2026. However, worries about inflation, along with rising concerns about fiscal sustainability resulted in significant steepening of the yield curve. US Treasury yields steepened, with the 30-year climbing as fiscal concerns resurfaced.
- Fiscal strains were also in focus in Europe. France, with a 5.5% deficit, faces an excessive debt procedure and political instability, with a no-confidence vote looming. UK fiscal credibility is weakening amid policy U-turns and a worsening debt outlook. The BoE cut rates by 25bps but struck a hawkish tone as inflation is expected to reach 4%, while long gilt yields hit a 27-year high.
- After a strong rally since April, stretched equity valuations and rising bond yields suggest scope for near-term consolidation. Still, resilient growth, expected US rate cuts, and AI-driven productivity gains support a constructive medium-term outlook, though caution is warranted short term.

IMPORTANT INFORMATION

Prior to 15.04.2024 the Momentum Passive Plus Moderate Portfolio was known as pi Balanced Portfolio.

Fact sheet geographic allocation percentages are in some cases based on the normalised (or benchmark) asset allocations of investee funds, as opposed to the actual exposures of those funds at the date of the fact sheet. This reflects the expected average allocation over time which will result from decisions to hold particular funds.

This material is confidential and is intended solely for the use of the person or persons to whom it is given or sent and may not be reproduced, copied or given, in whole or in part, to any other person. It is not an invitation to subscribe and is by way of information only. Nothing contained herein constitutes investment, legal, tax or other advice nor is it to be solely relied on in making an investment or other decision. If you are considering investing in the Momentum Passive Plus Portfolios ("Portfolios") clients should consult a suitably qualified and approved Financial Adviser. The performance shown represents performance of the Portfolios that are periodically restructured and rebalanced based on the impact of material, economic and market factors that influence MGIM's decision-making on asset allocation. The Portfolios are applied to client accounts by the platform provider but it may take some time for the client accounts to mirror the performance of the Portfolios. It is for this reason that client accounts may not have achieved exactly the same returns as the Portfolios. The performance of the Portfolios is based on the actual performance of the underlying funds included in the portfolios. These performance figures have not been audited by an external body. The value of investments may go down as well as up and the value will depend on fluctuations in financial markets outside MGIM's control, as a result an investor may not get back the amount invested. Past performance is not indicative of future performance and reference to a security is not a recommendation to buy or sell that security. Portfolio ratings: Defaqto is a financial information business. Profile published 11.06.2025 by Distribution Technology based on data and information as at 31.03.2025.
