

Momentum Passive Plus Moderate Portfolio

31 October 2024

For professional advisors only

INVESTMENT OBJECTIVE & STRATEGY

The Momentum Passive Plus Moderate Portfolio aims to deliver growth in real terms aligned to the risk profile of the solution, with anticipated volatility in the range of 8-11%. The portfolio aims to operate within the 'low medium' risk profile. The portfolio will invest across a range of asset classes using passive instruments.

The value of the underlying funds and the income generated from them can go down as well as up, and is not guaranteed. Investors may not get back the original amount invested. The value of investments involving exposure to foreign currencies can be affected by currency exchange rate fluctuations. Past performance is not a guide to future performance.

MONTHLY COMMENTARY

- In October, the most significant market shift was a substantial rise in bond yields, reversing much of the decline seen in Q3. Following the Fed's 50bps rate cut on September 18th, the 10-year Treasury yield, which had fallen to 3.7%, rose by almost 60bps by the end of October, reaching around 4.3%. This increase continued post-election, nearing 4.5%. Expectations for future rate cuts also changed significantly, with the Fed Funds rate now projected to be 3.78% by the end of 2025, up from 2.78% in mid-September.
- Bonds had a poor month, with global bonds returning -3.4% and UK gilts and UK investment grade corporate bonds returning -2.8% and -1.4% respectively. US Treasuries and US investment grade corporate bonds returned 1.9% and 1.8%, with the dollar rising 3.7% against the pound. Global developed markets returned 2.1% with emerging markets returning -0.4%. Within developed equities, the US was the strongest performer over October, returning 3.2% in GBP terms. Elsewhere, gold rose by 8.5%.
- The US economy continued to show strength, with Q3 GDP growing at an annualised rate of 2.8%. Labour market data was mixed but generally indicated resilience. This economic strength led the Fed to push back against market expectations for aggressive rate cuts.
- Outside the US, the ECB made its second 25bps rate cut of the cycle, responding to a fall in Euro Area CPI to 1.7% in September and ongoing weakness in the manufacturing sector. In Japan, political uncertainty arose after the ruling coalition lost its majority in a snap election. And in the UK, the Labour government's first budget introduced significant tax increases and public spending, raising inflation risks and bond yields.
- Overall, while the US showed economic resilience, high tax and regulatory regimes in Europe and the UK continued to stifle growth. Our investment strategy remains cautiously constructive, with plans to add to risk assets during periods of market weakness.

IMPORTANT INFORMATION

Prior to 15.04.2024 the Momentum Passive Plus Moderate Portfolio was known as pi Balanced Portfolio. Fact sheet geographic allocation percentages are in some cases based on the normalised (or benchmark) asset allocations of investee funds, as opposed to the actual exposures of those funds at the date of the fact sheet. This reflects the expected average allocation over time which will result from decisions to hold particular funds.

This material is confidential and is intended solely for the use of the person or persons to whom it is given or sent and may not be reproduced, copied or given, in whole or in part, to any other person. It is not an invitation to subscribe and is by way of information only. Nothing contained herein constitutes investment, legal, tax or other advice nor is it to be solely relied on in making an investment or other decision. If you are considering investing in the Momentum Passive Plus Portfolios ("Portfolios") clients should consult a suitably qualified and approved Financial Adviser. The performance shown represents performance of the Portfolios that are periodically restructured and rebalanced based on the impact of material, economic and market factors that influence MGIM's decision-making on asset allocation. The Portfolios are applied to client accounts by the platform provider but it may take some time for the client accounts to mirror the performance of the Portfolios. It is for this reason that client accounts may not have achieved exactly the same returns as the Portfolios. The performance of the Portfolios is based on the actual performance of the underlying funds included in the portfolios. These performance figures have not been audited by an external body. The value of investments may go down as well as up and the value will depend on fluctuations in financial markets outside MGIM's control, as a result an investor may not get back the amount invested. Past performance is not indicative of future performance and reference to a security is not a recommendation to buy or sell that security. Portfolio ratings: Defaqto is a financial information business.
