HARMONY IN THE HOUSE

A project, that represents all about Kenya's characteristics in its own style.

A survivor, who is able to stay alive in the wild nature due to its independence and courageous stance.

An urbanite, due to its elegant and social quality.

Timeless and mysterious design adapts with the elements of Kenya's human journey in time.

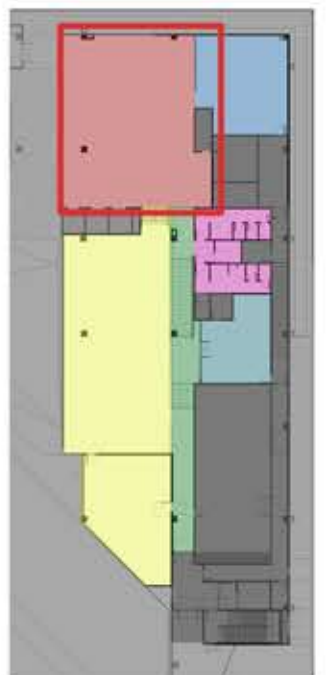

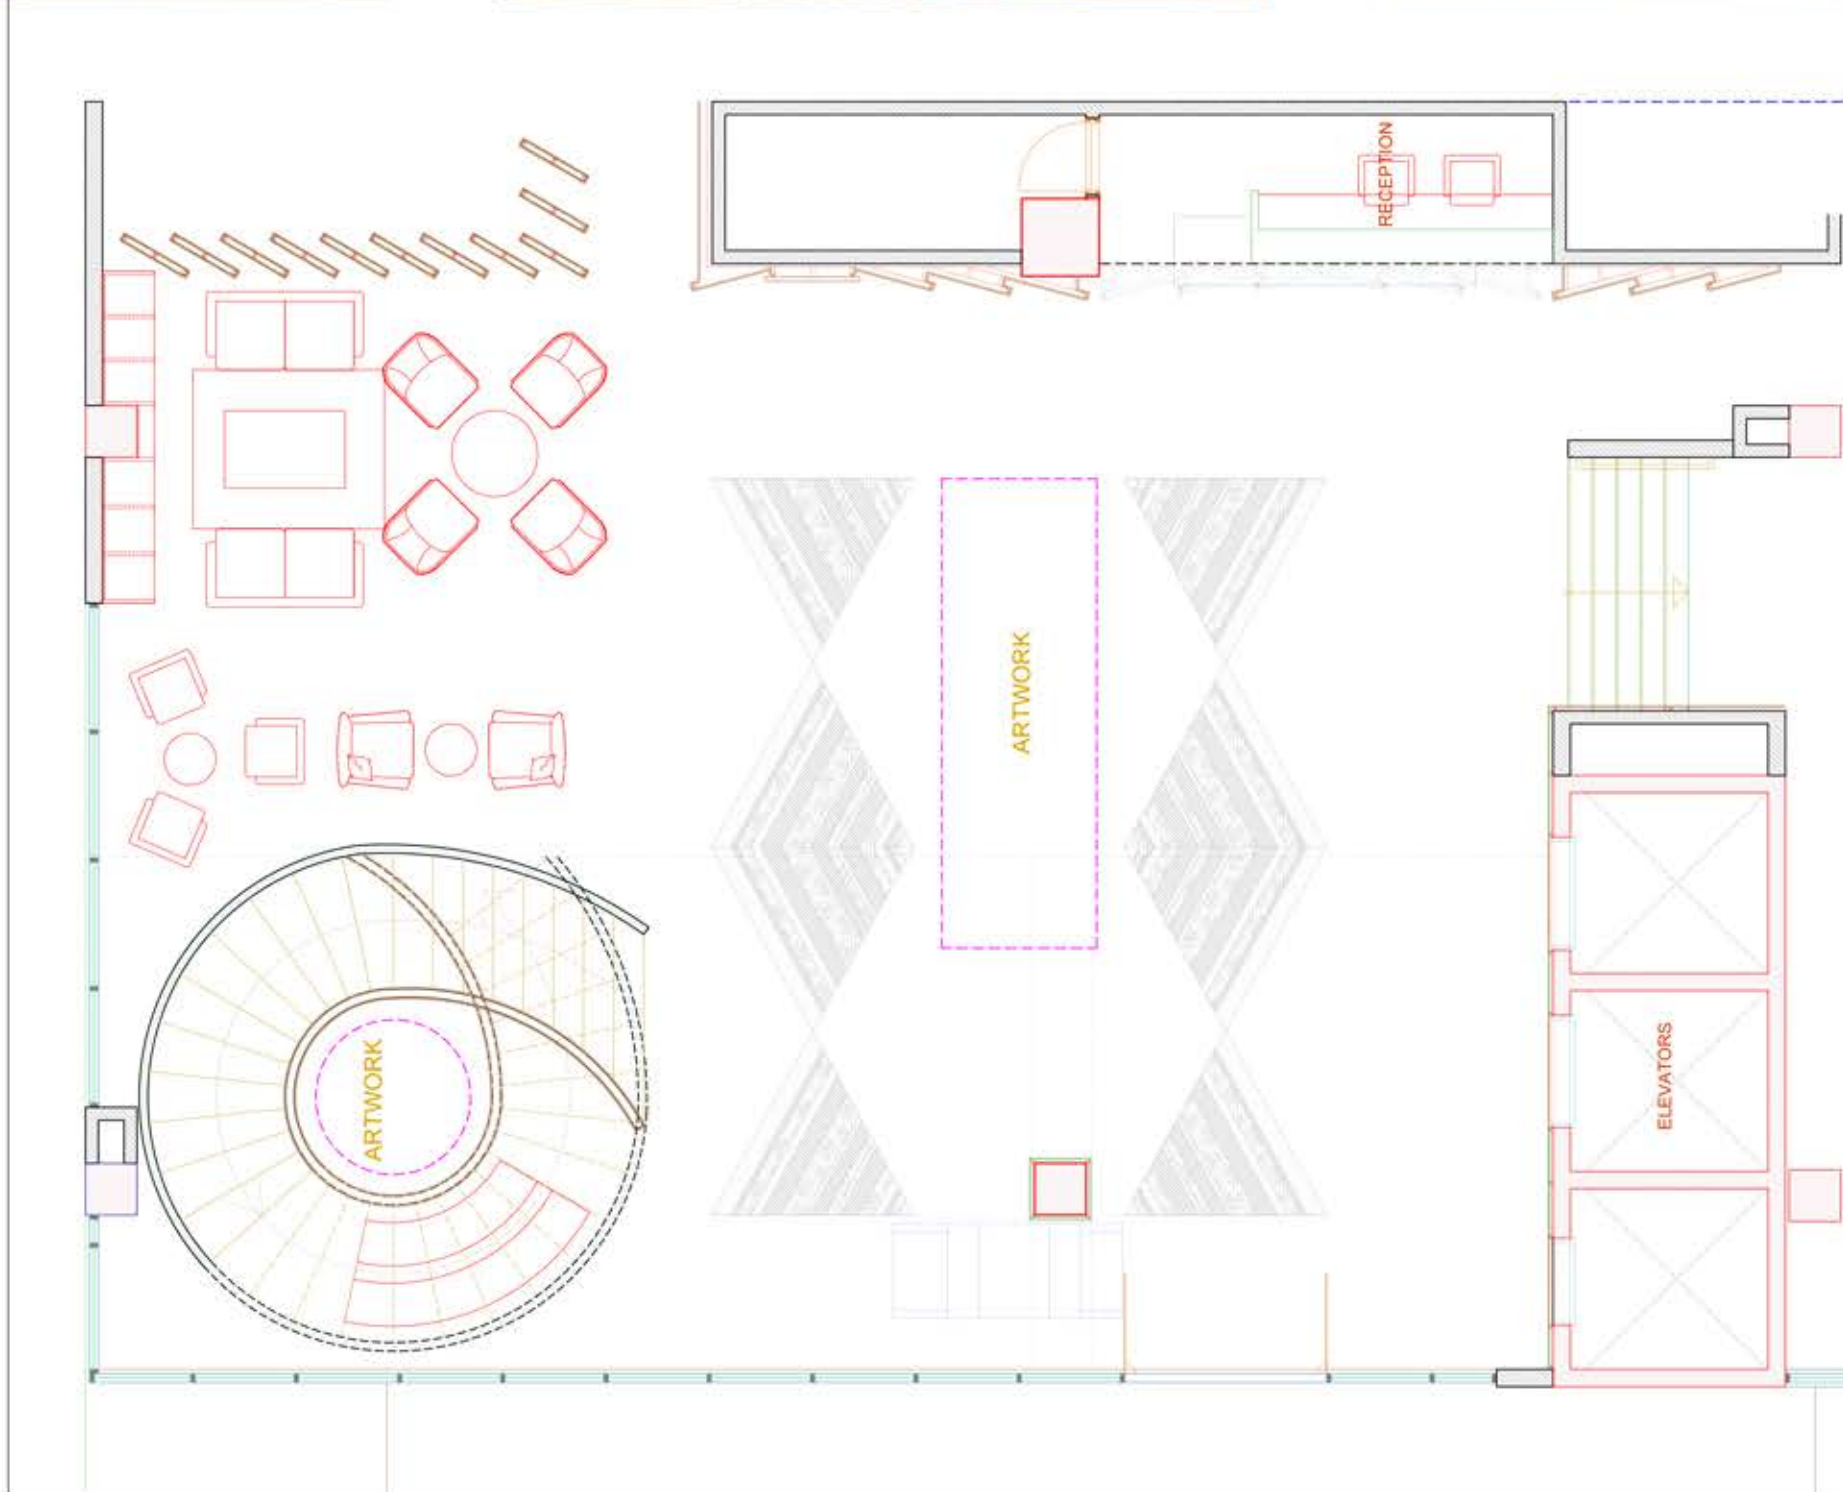

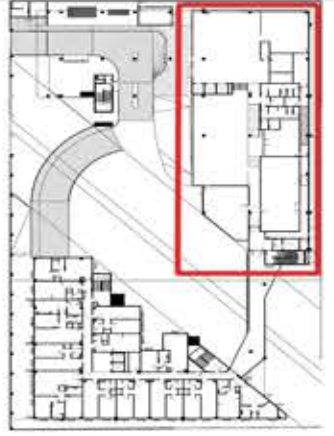

A design that reflects the embracement of mother nature with its calm, soft and fresh ambience.

And a project that keeps the diversity of Kenya alive within, due to its' habitat scenario which are all privatized and still exists together in a harmony.
