

Momentum Real Assets Growth & Income Fund Class A GBP

28 August 2026

This is a marketing communication for professional advisors only

Investment objective*

The portfolio aims to achieve a total return of at least 7% per annum including income of at least 3% per annum over the recommended minimum investment horizon (6 years).

The Fund will be actively managed, seeking to achieve its investment objective or gaining exposure to 'real assets' such as real estate or infrastructure related assets by primarily investing in listed companies, including Investment Trusts and Real Estate Investment Trusts (REITs), collective investment schemes and other similar schemes. This encompasses a range of asset classes and currencies in varying proportions over time, with an overall bias towards asset classes that have the potential for capital growth.

Manager commentary

- » The Fund delivered a positive return of 1.9% during August. Performance was supported by private equity and while infrastructure and defensive holdings also made positive contributions; property was the principal area of weakness.
- » Private equity was the largest contributor to returns, led by Molten Ventures, which rose 17.4% during the month as the discount continues to close helped by positive news flow from two of its largest holdings (Revolut and ICEYE). Oakley Capital Investments gained 5.0%, while Partners Group Private Equity advanced 9.1%. Chrysalis Investments also delivered a positive return, although its contribution was more modest.
- » Seraphim Space Investment Trust C shares gained 23.5%. We felt the recent weakness in these shares was harsh as they had not yet deployed their capital and the market was effectively applying a discount to a cash balance. August saw a reduction in that uncertainty as they completed two transactions and the market reacted positively.
- » Infrastructure generated positive returns overall. Gore Street Energy Storage Fund rose 5.8%, the holding trades at a significant discount to NAV and that discount reduced slightly during the month as they sold two assets (Kilmannock and Mucklagh) above carrying value.
- » Property was the main detractor, linked primarily to bond yields rising. British Land declined 2.8% and LondonMetric Property fell 1.3%, while Living REIT was slightly weaker. However, Primary Health Properties, Segro and AEW UK REIT all delivered positive returns, helping to moderate the overall impact.
- » Defensive assets performed positively, with both nominal and index-linked UK government bonds advancing. Overall, August demonstrated the benefit of the Fund's diversified exposure, with strong returns from private equity and specialist growth assets complemented by positive contributions from infrastructure, credit and government bonds.
