

VT Momentum Diversified Moderate Fund (A)

28 June 2024

For professional advisors only

INVESTMENT OBJECTIVE & STRATEGY

The VT Momentum Diversified Moderate Fund aims to deliver a real return for investors over the medium to long term of CPI +5% net of fees, with anticipated volatility in the range of 8-11%. The Fund aims to operate within the 'low medium' risk profile as defined by Distribution Technology, the independent fund rating agency. The Fund will invest across a range of asset classes using third party investment funds, and is classified in the IA Mixed Investment 40-85% Shares sector. The minimum investment horizon for the Fund should be thought of as six years.

FIVE YEAR HISTORICAL CUMULATIVE PERFORMANCE

Sources: Morningstar, Valu-Trac Investment Management, MGIM.
Fund performance is calculated on a total return basis, net of all fees and in GBP terms. The value of the underlying funds and the income generated from them can go down as well as up, and is not guaranteed. Investors may not get back the original amount invested. The value of investments involving exposure to foreign currencies can be affected by currency exchange rate fluctuations. Past performance is not a guide to future performance.

MONTHLY COMMENTARY

- Moonpig returned over 19% during the month, following their strong FY24 results which exceeded estimates. The reduction in net debt from 1.7x to 1.3x EBITDA and sector-leading margins highlight the company's robust financial health and potential for future outperformance.
- XPS Pensions was another strong performer over the month, returning over 18%, driven by their stellar FY24 results which saw group revenue grow by 21% to £197 million, materially ahead of our initial assumptions when first initiating a position in June 2023. All divisions posted double-digit revenue growth, and EBITDA margins expanded by 240bps to 27.9%, resulting in a 32% increase in EBITDA to £55 million. The strong financial performance, coupled with strategic initiatives like the AI Driven Actuary tool and new administration platform Aurora, underscores the company's strong growth prospects.
- Molten Ventures returned over 10% during the month, boosted by an increase in gross portfolio value to £1,379 million and a 4.8% rise in net assets. The company's strategic acquisition of Forward Partners and a 19% LP stake in Seedcamp's 2014 Fund III contributed to this growth. The strong realisation pipeline and updated capital allocation policy, including share buybacks, signal potential for continued outperformance, especially with the shares still trading at an unjustifiably wide discount to net asset value.
- Burberry, introduced to the portfolio last month, was increased further due to recent share price weakness, funded by a reduction in LBG Media given their recent strong performance (+42%) in the three months to end June.

OCF = Ongoing Charge Figure IC = Underlying charges of closed ended funds.
The OCF is the total expenses paid by the Fund, annualised, against its average net asset value. The OCF will fluctuate as the average net assets and costs change.

Important note: The OCF calculation includes synthetic costs from underlying closed ended investments (IC) such as Investment Trusts, which optically increases the costs. For the avoidance of doubt the actual amount charged has not changed, and advisers and investors should refer to the KIID document available [here](#) for the actual fees payable.
