

Momentum Real Assets Growth & Income Fund Class L GBP Acc

31 July 2025

This is a marketing communication for professional advisors only

Investment objective*

The portfolio aims to achieve a total return of at least 7% per annum including income of at least 3% per annum over the recommended minimum investment horizon (6 years).

The Fund will be actively managed, seeking to achieve its investment objective or gaining exposure to 'real assets' such as real estate or infrastructure related assets by primarily investing in listed companies, including Investment Trusts and Real Estate Investment Trusts (REITs), collective investment schemes and other similar schemes. This encompasses a range of asset classes and currencies in varying proportions over time, with an overall bias towards asset classes that have the potential for capital growth.

Manager commentary

- » Specialist assets delivered a positive return in July, with the largest contributions coming from private equity and specialist financial holdings. DP Aircraft, Chrysalis Investments and Molten Ventures were among the top performers.
- » Chrysalis reported a 13.7% increase in net asset value (NAV) over Q2 2025, driven by a material uplift in Starlings valuation and a double-digit percentage increase in Klarna - its two largest holdings. The managers note that the top three portfolio companies, now representing 71% of NAV, each have clear routes to drive future value accretion.
- » During the month, we introduced a new position in BH Macro (BHMGM), a listed feeder fund into the Brevan Howard Master Fund. Brevan Howard, founded in 2002, is regarded as one of the top hedge fund managers globally and has managed the Master Fund since 2003. BHMGM seeks to deliver compelling, asymmetric returns regardless of market conditions, offering a highly liquid access point to Brevan Howards strategies. Unlike traditional equity or bond managers, BH traders do not rely on forecasting the outright direction of markets. Instead, they assess potential outcomes against current market pricing. Where they see mispricing, they structure convex trades that offer attractive upside if correct, while limiting downside if wrong. Risk management is central to the teams process. The Master Fund allocates capital across diverse trading teams, ensuring performance is not dependent on any one manager, market view, or asset class. A dedicated risk team monitors both individual mandates and overall portfolio exposure. For investors, BHMGM can act as a low-volatility compounder, aiming to generate positive returns when opportunities arise while protecting capital during downturns.
