Fund performance is calculated on a total return basis, net of all fees and in GBP terms. The value of the underlying funds and the income generated from them can go down as well as up, and is not guaranteed. Investors may not get back the original amount invested. The value of investments involving exposure to foreign currencies can be affected by currency exchange rate fluctuations.

MONTHLY COMMENTARY

- Equity markets rallied in May despite a volatile backdrop dominated by renewed tariff tensions, resilient inflation and rising bond yields. Sentiment improved as the US softened its trade stance, agreeing a 90-day negotiation window with China and postponing proposed tariffs on EU goods. This helped ease recession fears and supported risk appetite.
- US equities led the advance, with the S&P 500 gaining 5.4% on strong earnings and AI optimism. Global developed markets returned 5.0% and emerging markets 3.4%, while bond markets remained under pressure from sticky inflation and debt concerns.
- The fund benefitted from its developed market equity exposure, particularly UK mid- and small-cap investment trusts. UK equities returned 3.5% in May, but UK small caps significantly outperformed, gaining 7.7%. Aberforth Smaller Companies and Temple Bar were therefore notable contributors over the month. Global equity strategies also added value, with strong performance from the Curate Global Value Fund, and the L&G S&P 500 Equal Weighted Index Fund which benefitted from broad-based gains across US equities.
- Emerging markets also contributed positively to returns, with the Schroder EM Value Fund returning 6.3%, outperforming the broader EM index.
- Specialist assets also contributed positively amid a rotation into risk assets, top performers included Molten Ventures in private equity, DP Aircraft in specialist financials and Cordiant Digital Infrastructure.
- While the immediate tariff threats have faded, the path ahead remains unpredictable. We recognise the wide range of potential outcomes given current uncertainties, and firmly believe that diversification will be vital, but volatility will create opportunities to add to risk in our portfolios, albeit with caution and patience in the short term.
