

VT Momentum Diversified Cautious Fund (A)

31 December 2024

For professional advisors only

INVESTMENT OBJECTIVE & STRATEGY

The VT Momentum Diversified Cautious Fund aims to deliver a real return for investors over the medium to long term of CPI +3% net of fees, with anticipated volatility in the range of 4-7%. The Fund aims to operate within the 'low' risk profile as defined by Distribution Technology, the independent fund rating agency. The Fund will invest across a range of asset classes using third party investment funds, and is classified in the IA Mixed Investment 0-35% Shares sector. The minimum investment horizon for the Fund should be thought of as four years.

FIVE YEAR HISTORICAL CUMULATIVE PERFORMANCE

Sources: Morningstar, Valu-Trac Investment Management, MGIM.
Fund performance is calculated on a total return basis, net of all fees and in GBP terms. The value of the underlying funds and the income generated from them can go down as well as up, and is not guaranteed. Investors may not get back the original amount invested. The value of investments involving exposure to foreign currencies can be affected by currency exchange rate fluctuations. Past performance is not a guide to future performance.

MONTHLY COMMENTARY

- We have introduced the Schroder Emerging Markets Value fund, exiting the iShares EM Dividend ETF. This strategy is managed by Schroder's renowned Global Value team, which has origins dating back to 1970. The team's contrarian, bottom-up investment philosophy is grounded in 150 years of market data, demonstrating that lowly valued securities deliver excess returns over the long term. Schroder EM Value focuses exclusively on the cheapest securities within the emerging markets universe, with a disciplined and consistent process. The strategy is managed by two dedicated specialists bringing deep regional knowledge and passion for value investing in these markets. By adding this differentiated strategy, we have enhanced our emerging markets exposure, particularly in underrepresented regions outside of Asia.
- Several holdings within the portfolio performed well in December. Digital 9 Infrastructure rose by 27.4% in December after announcing the \$42m sale of its Emic-1 project, releasing the company from additional construction commitments and the proceeds will be used to repay its revolving credit facility.
- Schroders Capital Global Innovation Trust rose by 14.8% in December following the announcement that its continuation vote will be brought forward. The Trust trades at a significant discount to NAV, making possibility of a managed wind-down attractive allowing investors to recover their capital closer to NAV. Pending the continuation vote, the Trust has paused new investments but will selectively fund existing holdings, ensuring shareholder returns remain a priority. Further details are expected in January 2025.
- Marston's returned 12.5% driven by strong financial results, including 13% year-on-year EBITDA growth, margin expansion and reduced net debt. Strong Christmas bookings also suggest potential future growth.
- Chrysalis Investments returned 12.2% following the completion of the sale of its Featurespace holding to Visa, delivering a 2.7x return on invested capital (rising to 3x if the amount held in escrow is paid in full). This strengthened liquidity, supporting ongoing share buybacks and capital return initiatives, providing a positive backdrop with potential future upside tied to portfolio events like Klarna's anticipated IPO.
