

This document provides you with information about this fund in relation to the Sustainable Finance Disclosure Regulation. It is not marketing material. The information is required by law to help you understand the sustainability characteristics and/or objectives and risks of this fund. You are advised to read it in conjunction with other relevant documentation on this fund so you can make an informed decision about whether to invest.

## Summary Sustainability-related disclosure

### Curate Global Sustainable Equity Fund (the "Fund")

*This financial product promotes environmental or social characteristics but does not have as its objective sustainable investment. The Fund appoints Robeco Institutional Asset Management B.V. ("Robeco") as a Sub-Investment Manager and as such many of Robeco's processes are followed as described throughout this document.*

#### The Fund has the following E/S characteristics:

- The Fund promotes good governance and sustainable corporate practices through proxy voting, which contributes to long-term shareholder value creation. This includes taking an active stance on social and environmental topics through Robeco's proxy voting policy.
- The Fund promotes certain minimum environmental and social safeguards through applying exclusion criteria with regards to products and business practices that the Fund believes are detrimental to society and incompatible with sustainable investment strategies.
- The Fund promotes having a 20% lower environmental footprint than the general market index.
- The Fund promotes adherence to and conducting business activities in accordance with the United Nations Universal Declaration of Human Rights, the International Labor Organization's (ILO) labor standards, the United Nations Guiding Principles for Business and Human Rights (UNGPs), the United Nations Global Compact (UNGC) and the OECD Guidelines for Multinational Enterprises, by scrutinizing companies that violate these principles.
- The Fund promotes having a weighted average ESG score that is at least 10% better than that of the general market index.
- The Fund promotes investment in a portfolio that avoids significant harm to the Sustainable Development Goals (SDGs).

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the Fund. The ESG characteristics of the Fund are compared against general market indices.

#### Investment Strategy

The Fund aims for an improved environmental footprint and a better sustainability profile compared to the Benchmark by integrating ESG (i.e., Environmental, Social and corporate Governance) factors. The Fund is actively managed and invests in stocks of companies in developed markets. The selection of these stocks is based on a quantitative model.

The strategy integrates sustainability indicators on a continuous basis as part of the stock selection process. Amongst others, the Fund applies norms-based and activity-based exclusions, Robeco's good governance policy and considers Principal Adverse Impacts in the investment process.

## **Planned asset allocation**

The Fund plans to make a minimum amount of 60% sustainable investments. All investments are aligned with the E/S characteristics, except for investments in the category “other” which are mostly cash and cash equivalents.

## **Monitoring and due diligence**

The Fund has incorporated the sustainability aspects of the investment strategies by largely utilising Robeco’s investment due diligence processes and procedures for the selection and monitoring of investments. Robeco’s portfolio managers and analysts are primarily responsible for conducting investment due diligence on their strategies on a daily basis. They are supported by independent monitoring, performed by Robeco’s Financial Risk Management and Investment Restrictions departments.

Oversight and independent verification of the investment strategy results are performed by Momentum Global Investment Management Ltd (the Investment Manager).

## **Data sources, methodologies, and limitations**

The Fund uses several sources for gathering sustainability data. The data quality of each provider is reviewed during due diligence assessments, that includes reviewing the data model, performing statistical checks, and evaluating coverage. Data processing takes places in different forms, the preference is always to have data acquisition as automated as possible to avoid any operational risks or unnecessary human intervention. For some social and environmental characteristics, the Fund relies on externally sourced content and aims to select the best of breed vendor for each of its target characteristics. The primary limitation to the methodology or data source is the lack of corporate disclosure. Like many other financial market participants, we struggle to find adequate information on the principal adverse indicators. To overcome this issue, the Fund uses multiple data providers, since each has its own respective strengths and weaknesses.

## **Engagement strategy**

The holdings of the Fund are subject to the selection process of Robeco’s value engagement program, that consists of a constructive dialogue between investors and investee companies to discuss how they manage ESG risks and opportunities, as well as stakeholder impact. Although this type of engagement is not directly related to the environmental or social investment strategy of the Fund, it can be that adverse sustainability impacts are addressed via the value engagement program.
