Momentum Global Managed Fund Class A USD

30 January 2026

Minimum Disclosure Document

Investment objective

The Fund is designed to offer a balance between capital preservation and capital appreciation over the medium to long term through investment in a diversified range of international asset classes and currencies. The Fund is ideally suited to investors with a medium risk tolerance with an investment horizon of 5 years or longer. The Fund intends to achieve its investment objective through a diversified global portfolio primarily consisting of investments in participatory interests of portfolios of collective investment schemes or other similar schemes.

Our investment approach is team based with all portfolio managers having specific areas of research focus and access to and input from the wider Momentum Global Investment Management team.

Capital *(probability of capital loss or negative return in any 12-month period)*

Past performance is not indicative of future returns. The Fund performance is calculated on a total return basis, net of all fees and in US dollar terms. NAV to NAV figures have been used for the performance calculations. The performance is calculated for the Fund. The individual investor performance may differ, as a result of various factors, including the actual investment date. Investment performance calculations are available for verification upon request. Annualised returns are period returns re-scaled to a period of 1 year. This allows investors to compare returns of different assets that they have owned for different lengths of time. Actual annual figures are available to investors upon request. Current asset allocation figures reflect the strategy classification of the collective investment schemes (or similar schemes) held by the Fund and do not look through to the underlying holdings of such schemes. °Global Cash comprises two components: i) prior to 01.01.22, a composite of: 50% ICE LIBOR 3M USD; 25% ICE LIBOR 3M EUR; 10% ICE LIBOR 3M GBP; 15% ICE LIBOR 3M JPY; ii) 01.01.22 to present, a composite of the following indices: 50% Bloomberg (BBg) 3M T-Bill Statistic; 25% BBg 3-6M Euro Treasury Bill (France Germany Netherlands); 10% BBg 0-3M Sterling Gilt + Bill Statistic; 15% BBg 1-3M JPY Treasury Bill. Prior to April 2019 the performance of the fund on this document was compared against a composite benchmark which comprised 65% MSCI AC World, 35% ICE BofAML Global Broad Market.

Redemptions cut-off time: Written notice to redeem must be received by the Administrator by no later than 12:00 noon (Guernsey time) on the Business Day immediately preceding the relevant Dealing Day.

Manager commentary**

» The new year opened with an extraordinary burst of geopolitical activity as the US launched strikes in Venezuela on 3 January, leading to the capture of Nicolás Maduro and the collapse of the Bolivarian leadership. Despite the severity of the headlines, markets reacted with relative indifference: oil prices barely moved, reflecting Venezuela's limited 1% contribution to global production. Far more consequential for sentiment were escalating tensions around the Persian Gulf, where protests across Iran reportedly resulted in thousands of deaths and raised the spectre of wider regional instability. Domestically, the US administration faced scrutiny following the deaths of two protesters in Minneapolis during ICE operations. Against this backdrop, Washington assembled a "huge armada" in pursuit of a renewed nuclear agreement with Tehran, echoing the rapid build up seen in Venezuela weeks earlier, though the latter had been framed under the Monroe Doctrine. Tensions even spilled into the Arctic, with a diplomatic clash over Greenland's status before President Trump appeared to rule out military escalation during remarks at Davos.

» Remarkably, these developments unfolded within a matter of weeks. Yet markets again opted to look through geopolitical noise, consistent with recent patterns in which investors discount hard to model "Trump risk" and refocus on fundamentals. In the US, representing over 70% of the MSCI World Index, fourth quarter earnings season began strongly, with solid revenue and profit growth and broad upside surprises. The domestic economy remained resilient, inflation contained, and the Federal Reserve kept rates unchanged in January. Equity leadership broadened, with small cap stocks outperforming by a notable margin: the Russell 2000 gained 5% versus a -0.3% return for the "Magnificent Seven." Asian markets were mixed, though Korea remained exceptional, rising 23.4% in January after an 80% surge in 2025. Emerging market equities benefitted from risk on sentiment and continued US dollar softness, with the DXY falling 1.4% for the month. Fixed income delivered steady if unremarkable returns, aside from sharp volatility at the long end of the Japanese curve.

» Precious metals extended their rally despite a late January correction: gold finished the month up 13%, silver 19%. While the "debasement trade" has structural appeal, such extreme moves appear difficult to reconcile with only modest dollar weakness. Markets may be under-pricing broader risks, reinforcing the case for diversification and maintaining exposure to quality, at what is arguably a discount in markets today.

Performance fee	0.00%
Directors' fee	US$ 20,000 p.a.

Total Expense Ratio (TER)†	1.31%
Financial year-end TER†	1.31%

†The TERs are the percentages of the net asset value of the class of the Financial Product incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. A current TER may not necessarily be an accurate indication of future TERs. The TER to 31.12.25 is based on data for the period from 31.12.24 to 31.12.25 and the financial year-end TER is based on data for the financial year-end to 30.06.25. Cost ratios are calculated using historical actual and/or estimated data and are provided solely as an indication/guide as to the annual expenses/costs that could be incurred. These ratios do not represent any current/actual charges or fees.

Risk warnings and important information. Collective investments are generally medium to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to the future. Collective investments are traded at ruling prices. Commission and incentives may be paid and, if so, would be included in the overall costs. All performance is calculated on a total return basis, after deduction of all fees and commissions and in US dollar terms. Forward pricing is used.

The Fund invests in other collective investments, which levy their own charges. This could result in a higher fee structure for the Fund. Fluctuations in the value of the underlying funds, the income from them and changes in interest rates mean that the value of the Fund and any income arising from it may fall, as well as rise, and is not guaranteed.

Deductions of charges and expenses mean that you may not get back the amount you invested. The fees charged within the Fund and by the managers of the underlying funds are not guaranteed and may change in the future.

Higher risk investments may be subject to sudden and larger falls in value in comparison to other investments. Higher risk investments include, but are not limited to, investments in smaller companies, even in developed markets, investments in emerging markets or single country debt or equity funds and investments in high yield or non-investment grade debt.

Notwithstanding ongoing monitoring of the underlying funds within the Fund, there can be no assurance that the performance of the funds will achieve their stated objectives. The Fund will contain shares or units in underlying funds that invest internationally. The value of an investor's investment and the income arising from it will therefore be subject to exchange rate fluctuations.

Foreign securities may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.

The Fund may contain shares or units in underlying funds that do not permit dealing every day. Investments in such funds will only be realisable on their dealing days. It is not possible to assess the proper market price of these investments other than on the fund's dealing days.

No borrowing will be undertaken by the Fund except for the purpose of meeting short term liquidity requirements. Borrowings will not exceed 10% of the net asset value of the Fund. For such purpose, the securities of the Fund may be pledged. No scrip borrowing will be allowed. The Fund is not permitted to enter into any form of borrowing or loan arrangement with other cells of the Company nor other collective investment schemes of the Manager.

While derivative instruments may be used for hedging purposes, the risk remains that the relevant instrument may not necessarily fully correlate to the investments in the Fund and accordingly not fully reflect changes in the value of the investment, giving rise to potential net losses.

Forward contracts are neither traded on exchanges nor standardised. Principals dealing in these markets are also not required to make markets in the currencies they trade, with the result that these markets may experience periods of illiquidity. Banks and dealers will normally act as principals and usually each transaction is negotiated on an individual basis.

The Manager has the right to close the Fund to new investors, in order to manage it more efficiently, in accordance with its mandate.

Investment in the Fund may not be suitable for all investors. Investors should obtain advice from their financial adviser before proceeding with an investment. Investors are reminded that any forecasts and/or commentary included in this MDD are not guaranteed to occur, and merely reflect the interpretation of the public information and propriety research available to the Investment Manager at a particular point in time.

This report should be read in conjunction with the prospectus of Momentum Mutual Fund ICC Limited and the supplement, in which all the current fees and fund facts are disclosed. Copies of these scheme particulars, including the Prospectus, Fund Supplement, and the annual accounts of the Scheme, which provide additional information, are available, free of charge, upon request from Momentum Wealth International Limited, La Plaiderie House, La Plaiderie, St Peter Port, Guernsey, GY1 1WF, Telephone +44 (0)1481 735480, or from our website www.momentum.co.gg. A schedule of similarities and differences is also available to South African investors and can be found on our website www.momentum.co.gg.

This report should not be construed as an investment advertisement, or investment advice or guidance or proposal or recommendation in any form whatsoever, whether relating to the Fund or its underlying investments. It is for information purposes only and has been prepared and is made available for the benefit of the investors in the Fund.

While all care has been taken by the Investment Manager in the preparation of the information contained in this report, neither the Manager nor Investment Manager make any representations or give any warranties as to the correctness, accuracy or completeness of the information, nor does either the Manager or Investment Manager assume liability or responsibility for any losses arising from errors or omissions in the information.
