

Momentum Global Managed Fund (Class A USD)

31 May 2024

Minimum Disclosure Document

Investment objective

The Fund is designed to offer a balance between capital preservation and capital appreciation over the medium to long term through investment in a diversified range of international asset classes and currencies. The Fund is ideally suited to investors with a medium risk tolerance with an investment horizon of 5 years or longer. The Fund intends to achieve its investment objective through a diversified global portfolio primarily consisting of investments in participatory interests of portfolios of collective investment schemes or other similar schemes.

Our investment approach is team based with all portfolio managers having specific areas of research focus and access to and input from the wider Momentum Global Investment Management team.

Source: Morningstar, Momentum Global Investment Management Limited, Northern Trust International Fund Administration Services (Guernsey) Limited. Past performance is not indicative of future returns. The Fund performance is calculated on a total return basis, net of all fees and in US dollar terms. NAV to NAV figures have been used for the performance calculations. The performance is calculated for the Fund. The individual investor performance may differ, as a result of various factors, including the actual investment date. Investment performance calculations are available for verification upon request. Annualised returns are period returns re-scaled to a period of 1 year. This allows investors to compare returns of different assets that they have owned for different lengths of time. Actual annual figures are available to investors upon request. Current asset allocation figures reflect the strategy classification of the collective investment schemes (or similar schemes) held by the Fund and do not look through to the underlying holdings of such schemes. *Global Cash comprises two components: i) prior to 01.01.22 Global Cash was a composite of 50% ICE LIBOR 3M USD; 25% ICE LIBOR 3M EUR; 10% ICE LIBOR 3M GBP; 15% ICE LIBOR 3M JPY; ii) from 01.01.22 to present Global Cash is a composite of 50% ICE BoA 3M US Treasury Bill index; 25% ICE BoA 3M German Treasury Bill index; 10% ICE BoA 3M Sterling Government Bill index; 15% ICE BofA Japan Treasury Bill index. Prior to April 2019 the performance of the fund on this document was compared against a composite benchmark which comprised 65% MSCI AC World, 35% ICE BofAML Global Broad Market.

Manager commentary**

- › In a reversal of the April sell-off, equity and bond markets generally performed well in May. US equities led the way, with tech dominant. The Magnificent 7 mega-cap tech stocks returned 10.3%, led by Nvidia on the back of yet another extraordinary set of quarterly results, with the company expecting demand for its products to outstrip supply into 2025. Following a period of underperformance the UK market is now regaining ground, particularly in the small- and mid-cap space where attractive valuations have piqued interest from private equity and overseas companies. PM Sunak's surprise call of a general election for 4th July has had a muted impact on markets, with a landslide victory for Labour seemingly inevitable.
- › Although US bonds had a better month than in April, Euro and Japanese government bonds fared less well. The uncertainty around the pace at which inflation can be brought back to central bank targets, and the resultant timing and extent of interest rate cuts, continued to generate considerable volatility in bond markets. The European and UK economies have been considerably weaker than the US, but a similar pattern of growth above expectations and inflation remaining sticky, with tight labour markets and rising real wages, has seen their central banks also pushing back on expectations of rate cuts.
- › Developed markets, measured by the MSCI World index, returned 4.5% over the month, with the US returning 4.9%. Emerging markets rose 0.6% in local terms. Bond markets returned 1.4% in May, as measured by the ICE BofA Global Broad Market index, with US Treasuries returning 1.5%.
- › With the presidential election looming, US fiscal deficits are becoming a concern as neither candidate seem prepared to make amends. This gives rise to concerns about funding this deficit in a higher yield world, and argues for caution in adding to duration, especially with cash rates offering high real yields. However, it remains the case that the next big move in monetary policy will be for loosening, with cuts in rates delayed, not cancelled. We are therefore looking for opportunities at higher yield levels to add to duration. In equities, we are encouraged by a broadening out of the market in recent months, and by generally healthy corporate profits. There is a risk of complacency, around inflation, a soft landing, high fiscal spending and debt sustainability, geopolitics and election risks, and diversification remains vital, but we are seeking opportunities to add to risk assets on weakness.

Fee information	per annum (p.a.)
Initial fee	N/A
Ongoing fees	
Investment management fee	0.50%

Minimum	US\$ 8,000 p.a.
Custodian fee per transaction	US\$ 25
Performance fee	0.00%
Directors' fee	US\$ 20,000 p.a.
Total Expense Ratio (TER)[†]	1.31%
Financial year-end TER[†]	1.32%

[†] The TERs are the percentages of the net asset value of the class of the Financial Product incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. A current TER may not necessarily be an accurate indication of future TERs. The TER to 28.03.24 is based on data for the period from 31.03.23 to 28.03.24 and the financial year-end TER is based on data for the financial year-end to 30.06.23. Cost ratios are calculated using historical actual and/or estimated data and are provided solely as an indication/guide as to the annual expenses/costs that could be incurred. These ratios do not represent any current/actual charges or fees.

Risk warnings and Important Information. Collective investments are generally medium to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to the future. Collective investments are traded at ruling prices. Commission and incentives may be paid and, if so, would be included in the overall costs. All performance is calculated on a total return basis, after deduction of all fees and commissions and in US dollar terms. Forward pricing is used.

The Fund invests in other collective investments, which levy their own charges. This could result in a higher fee structure for the Fund. Fluctuations in the value of the underlying funds, the income from them and changes in interest rates mean that the value of the Fund and any income arising from it may fall, as well as rise, and is not guaranteed.

Deductions of charges and expenses mean that you may not get back the amount you invested. The fees charged within the Fund and by the managers of the underlying funds are not guaranteed and may change in the future.

Higher risk investments may be subject to sudden and larger falls in value in comparison to other investments. Higher risk investments include, but are not limited to, investments in smaller companies, even in developed markets, investments in emerging markets or single country debt or equity funds and investments in high yield or non-investment grade debt.

Notwithstanding ongoing monitoring of the underlying funds within the Fund, there can be no assurance that the performance of the funds will achieve their stated objectives. The Fund will contain shares or units in underlying funds that invest internationally. The value of an investor's investment and the income arising from it will therefore be subject to exchange rate fluctuations.

Foreign securities may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.

The Fund may contain shares or units in underlying funds that do not permit dealing every day. Investments in such funds will only be realisable on their dealing days. It is not possible to assess the proper market price of these investments other than on the fund's dealing days.

No borrowing will be undertaken by the Fund except for the purpose of meeting short term liquidity requirements. Borrowings will not exceed 10% of the net asset value of the Fund. For such purpose, the securities of the Fund may be pledged. No scrip borrowing will be allowed. The Fund is not permitted to enter into any form of borrowing or loan arrangement with other cells of the Company nor other collective investment schemes of the Manager.

While derivative instruments may be used for hedging purposes, the risk remains that the relevant instrument may not necessarily fully correlate to the investments in the Fund and accordingly not fully reflect changes in the value of the investment, giving rise to potential net losses.

Forward contracts are neither traded on exchanges nor standardised. Principals dealing in these markets are also not required to make markets in the currencies they trade, with the result that these markets may experience periods of illiquidity. Banks and dealers will normally act as principals and usually each transaction is negotiated on an individual basis.

The Manager has the right to close the Fund to new investors, in order to manage it more efficiently, in accordance with its mandate.

Investment in the Fund may not be suitable for all investors. Investors should obtain advice from their financial adviser before proceeding with an investment. Investors are reminded that any forecasts and/or commentary included in this MDD are not guaranteed to occur, and merely reflect the interpretation of the public information and propriety research available to the Investment Manager at a particular point in time.

This report should be read in conjunction with the prospectus of Momentum Mutual Fund ICC Limited and the supplement, in which all the current fees and fund facts are disclosed.
