

Momentum Global Model Portfolio 4

31 October 2024

For professional advisors only

INVESTMENT OBJECTIVE & STRATEGY

This Portfolio has a moderately cautious investment strategy by holding assets at the lower end of the risk spectrum. This Portfolio will tend to be biased towards higher quality fixed income instruments and lower beta global equities.

INVESTMENT TEAM

Alex Harvey
Lead Oversight
Senior Portfolio Manager
& Investment Strategist

Gregoire Sharma
Senior Portfolio
& Research Analyst

Gabby Byron
Investment Services
Executive

Our investment approach is team based with all portfolio managers having specific areas of research focus and access to and input from the wider Momentum Global Investments team.

HISTORICAL CUMULATIVE PERFORMANCE SINCE FEBRUARY 2016¹

Performance is calculated on a total return basis in GBP terms. The value of the underlying funds and the income generated from them can go down as well as up, and is not guaranteed. Investors may not get back the original amount invested. The value of investments involving exposure to foreign currencies can be affected by currency exchange rate fluctuations.

Past performance is not a guide to future performance.

MONTHLY COMMENTARY

- In October, the most significant market shift was a substantial rise in bond yields, reversing much of the decline seen in Q3. Following the Fed's 50bps rate cut on September 18th, the 10-year Treasury yield, which had fallen to 3.7%, rose by almost 60bps by the end of October, reaching around 4.3%. This increase continued post-election, nearing 4.5%. Expectations for future rate cuts also changed significantly, with the Fed Funds rate now projected to be 3.78% by the end of 2025, up from 2.78% in mid-September.
- Bonds had a poor month, with global bonds returning -3.4% and UK gilts and UK investment grade corporate bonds returning -2.8% and -1.4% respectively. US Treasuries and US investment grade corporate bonds returned 1.9% and 1.8%, with the dollar rising 3.7% against the pound. Global developed markets returned 2.1% with emerging markets returning -0.4%. Within developed equities, the US was the strongest performer over October, returning 3.2% in GBP terms. Elsewhere, gold rose by 8.5%.
- The US economy continued to show strength, with Q3 GDP growing at an annualised rate of 2.8%. Labour market data was mixed but generally indicated resilience. This economic strength led the Fed to push back against market expectations for aggressive rate cuts.
- Outside the US, the ECB made its second 25bps rate cut of the cycle, responding to a fall in Euro Area CPI to 1.7% in September and ongoing weakness in the manufacturing sector. In Japan, political uncertainty arose after the ruling coalition lost its majority in a snap election. And in the UK, the Labour government's first budget introduced significant tax increases and public spending, raising inflation risks and bond yields.
- Overall, while the US showed economic resilience, high tax and regulatory regimes in Europe and the UK continued to stifle growth. Our investment strategy remains cautiously constructive, with plans to add to risk assets during periods of market weakness.

IMPORTANT INFORMATION

Fact sheet asset allocation percentages are in some cases based on the normalised (or benchmark) asset allocations of investee funds, as opposed to the actual exposures of those funds at the date of the fact sheet. This reflects the expected average allocation over time which will result from decisions to hold particular funds.

It is not an invitation to subscribe and is by way of information only. Nothing contained herein constitutes investment, legal, tax or other advice nor is it to be solely relied on in making an investment or other decision. If you are considering investing in the Momentum Global Model Portfolios clients should consult a suitably qualified and approved Financial Adviser. The performance shown represents performance of the Global Model Portfolios that are periodically restructured and rebalanced based on the impact of material, economic and market factors that influence MGIM's decision-making on asset allocation. The Global Model Portfolios are applied to client accounts by the platform provider but it may take some time for the client accounts to mirror the performance of the Global Model Portfolios. It is for this reason that client accounts may not have achieved exactly the same returns as the Global Model Portfolios. The performance of the Global Model Portfolios is based on the actual performance of the underlying funds included in the portfolios. These performance figures have not been audited by an external body. The value of investments may go down as well as up and the value will depend on fluctuations in financial markets outside MGIM's control, as a result an investor may not get back the amount invested. Past performance is not indicative of future performance and reference to a security is not a recommendation to buy or sell that security.
