The value of the underlying funds and the income generated from them can go down as well as up, and is not guaranteed. Investors may not get back the original amount invested. The value of investments involving exposure to foreign currencies can be affected by currency exchange rate fluctuations. Past performance is not a guide to future performance.

Monthly commentary

- Markets entered the New Year amid heightened geopolitical tension, including developments in Venezuela and escalating rhetoric around the Middle East and Arctic security. Despite this, markets remained resilient. In the US, Q4 earnings season began strongly, inflation remained broadly contained and the Federal Reserve held interest rates steady. Risk appetite was further supported by a weakening US dollar and a broadening equity rally, with small caps outperforming large caps.
- The Fund delivered positive returns in January, driven primarily by equities. UK small-cap equities were the strongest performers within developed markets. Emerging market equities and Asia Pacific ex-Japan also performed particularly well. However, quality-style equities continued to lag within both DM and EM. Within fixed income, inflation-linked gilts outperformed nominal government bonds.
- Within specialist assets, property holdings were key contributors. Primary Health Properties (PHP) released a positive trading update, confirming completion of its merger with Assura, creating a £6bn healthcare REIT and achieving 60% of projected annualised synergies within two months. Rent reviews increased the contracted rent roll by 6.8% and the company announced its 30th consecutive year of dividend growth. Elsewhere, Life Science REIT (LABS) agreed terms to be acquired by British Land valuing the company at approximately £150m. Post-acquisition, LABS shareholders are expected to hold 2.4% of the enlarged group.
- Within infrastructure, we introduced Pantheon Infrastructure (PINT), which provides exposure to a diversified global portfolio of high-quality infrastructure assets across digital infrastructure, utilities, transport, renewables and social investments. The company targets 8-10% annual NAV total returns and a 4% dividend yield.
- Gold was another notable contributor, gaining over 20% mid-month before settling at 11% in GBP terms.
- Whilst we continue to favour owning risk assets, we remain mindful of underlying macro and geopolitical uncertainties.
