

Momentum Global Cautious Fund Class A USD

30 June 2026

Minimum Disclosure Document

Investment objective

The Fund is designed to offer capital preservation with some opportunity for capital appreciation over the medium term through investment in a diversified range of international asset classes and currencies. The Fund is ideally suited to investors with a low risk tolerance with an investment horizon of 3 years or longer. The Fund intends to achieve its investment objective through a diversified global portfolio primarily consisting of investments in participatory interests of portfolios of collective investment schemes or other similar schemes.

Our investment approach is team based with all portfolio managers having specific areas of research focus and access to and input from the wider Momentum Global Investment Management team.

Source: Morningstar, Momentum Global Investment Management Limited, Northern Trust International Fund Administration Services (Guernsey) Limited. Past performance is not indicative of future returns. The Fund performance is calculated on a total return basis, net of all fees and in US dollar terms. NAV to NAV figures have been used for the performance calculations. The performance is calculated for the Fund. The individual investor performance may differ, as a result of various factors, including the actual investment date. Investment performance calculations are available for verification upon request. Annualised returns are period returns re-scaled to a period of 1 year. This allows investors to compare returns of different assets that they have owned for different lengths of time. Actual annual figures are available to investors upon request. Current asset allocation figures reflect the strategy classification of the collective investment schemes (or similar schemes) held by the Fund and do not look through to the underlying holdings of such schemes. *Global Cash comprises two components: i) prior to 01.01.22, a composite of: 50% ICE LIBOR 3M USD; 25% ICE LIBOR 3M EUR; 10% ICE LIBOR 3M GBP; 15% ICE LIBOR 3M JPY; ii) 01.01.22 to present, a composite of the following indices: 50% Bloomberg (BBG) 3M T-Bill Statistic; 25% BBG 3-6M Euro Treasury Bill (France Germany Netherlands); 10% BBG 0-3M Sterling Gilt + Bill Statistic; 15% BBG 1-3M JPY Treasury Bill. Prior to April 2019 the performance of the fund on this document was compared against a composite benchmark which comprised 30% MSCI AC World, 70% ICE BofAML Global Broad Market.

Manager commentary**

- » The Iran war remained the dominant influence on global markets during the second quarter of 2026, with investor sentiment swinging repeatedly between fears of further escalation and hopes for a negotiated settlement. Elevated oil prices throughout April and May pushed global inflation expectations higher and prompted markets to reassess the likely path of interest rates. Strong US economic data, especially labour market indicators, combined with more hawkish-than-expected commentary from new Federal Reserve (Fed) Chair Kevin Warsh, reinforced expectations that the next US policy move could be an interest rate hike rather than a cut.
- » Despite these challenges, global equity markets have demonstrated notable resilience so far this year. The initial sell-off following the onset of the Iran conflict was rapidly reversed, largely due to exceptionally strong US earnings growth and broad-based upward revisions to profit expectations. Positive earnings surprises have been substantial and widespread: the median US company delivered a positive earnings surprise of around 6% in the first quarter – a level comparable in magnitude only to the post-COVID recovery phase. Given that already elevated expectations typically make such surprises harder to achieve, this underscores the strength of the current US earnings cycle. Moreover, corporate profit growth is expected to be robust worldwide in 2026-27, not just in the US.
- » In contrast, global bond markets continue to face structural headwinds. Rising inflation, elevated fiscal deficits, high issuance levels and significant US refinancing risks, with a large portion of debt maturing soon, are contributing to persistently high bond yields. Those higher yields in turn weighed on gold and other precious metals during the quarter.
- » Importantly, the relationship between equities and bonds has evolved. Rising bond yields are increasingly constraining equity valuations, with thresholds such as US 10-year yields above 4.5% historically associated with multiple compression. As a result, equity markets are becoming more sensitive to interest rate expectations.
- » Despite a supportive fundamental environment, there are still risks in markets. Equity valuations, particularly in the US, remain elevated, and the sustainability of returns is increasingly dependent on interest rate dynamics. This is an environment in which one should remain broadly invested in our view, given attractive yields on offer, but investors should be prepared for bouts of volatility and keep an eye out for signs of sticky inflation and speculative behaviour in the tech space.

Fee information	per annum (p.a.)

<i>Custodian fee per transaction</i>	US\$ 25
Performance fee	0.00%
Directors' fee	US\$ 20,000 p.a.

Total Expense Ratio (TER)†	1.27%
Financial year-end TER†	1.30%

†The TERs are the percentages of the net asset value of the class of the Financial Product incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. A current TER may not necessarily be an accurate indication of future TERs. The TER to 31.03.26 is based on data for the period from 31.03.25 to 31.03.26 and the financial year-end TER is based on data for the financial year-end to 30.06.25. Cost ratios are calculated using historical actual and/or estimated data and are provided solely as an indication/guide as to the annual expenses/costs that could be incurred. These ratios do not represent any current/actual charges or fees.

Risk warnings and important information. Collective investments are generally medium to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to the future. Collective investments are traded at ruling prices. Commission and incentives may be paid and, if so, would be included in the overall costs. All performance is calculated on a total return basis, after deduction of all fees and commissions and in US dollar terms. Forward pricing is used.

The Fund invests in other collective investments, which levy their own charges. This could result in a higher fee structure for the Fund. Fluctuations in the value of the underlying funds, the income from them and changes in interest rates mean that the value of the Fund and any income arising from it may fall, as well as rise, and is not guaranteed.

Deductions of charges and expenses mean that you may not get back the amount you invested. The fees charged within the Fund and by the managers of the underlying funds are not guaranteed and may change in the future.

Higher risk investments may be subject to sudden and larger falls in value in comparison to other investments. Higher risk investments include, but are not limited to, investments in smaller companies, even in developed markets, investments in emerging markets or single country debt or equity funds and investments in high yield or non-investment grade debt.

Notwithstanding ongoing monitoring of the underlying funds within the Fund, there can be no assurance that the performance of the funds will achieve their stated objectives. The Fund will contain shares or units in underlying funds that invest internationally. The value of an investor's investment and the income arising from it will therefore be subject to exchange rate fluctuations.

Foreign securities may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.

The Fund may contain shares or units in underlying funds that do not permit dealing every day. Investments in such funds will only be realisable on their dealing days. It is not possible to assess the proper market price of these investments other than on the fund's dealing days.

No borrowing will be undertaken by the Fund except for the purpose of meeting short term liquidity requirements. Borrowings will not exceed 10% of the net asset value of the Fund. For such purpose, the securities of the Fund may be pledged. No scrip borrowing will be allowed. The Fund is not permitted to enter into any form of borrowing or loan arrangement with other cells of the Company nor other collective investment schemes of the Manager.

While derivative instruments may be used for hedging purposes, the risk remains that the relevant instrument may not necessarily fully correlate to the investments in the Fund and accordingly not fully reflect changes in the value of the investment, giving rise to potential net losses.

Forward contracts are neither traded on exchanges nor standardised. Principals dealing in these markets are also not required to make markets in the currencies they trade, with the result that these markets may experience periods of illiquidity. Banks and dealers will normally act as principals and usually each transaction is negotiated on an individual basis.

The Manager has the right to close the Fund to new investors, in order to manage it more efficiently, in accordance with its mandate.

Investment in the Fund may not be suitable for all investors. Investors should obtain advice from their financial adviser before proceeding with an investment. Investors are reminded that any forecasts and/or commentary included in this MDD are not guaranteed to occur, and merely reflect the interpretation of the public information and propriety research available to the Investment Manager at a particular point in time.

This report should be read in conjunction with the prospectus of Momentum Mutual Fund ICC Limited and the supplement, in which all the current fees and fund facts are disclosed.
